

# How to play NUBE Card game Video

# How to Play

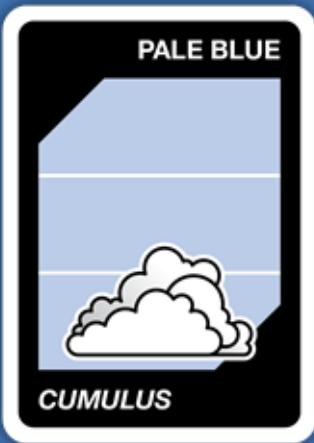

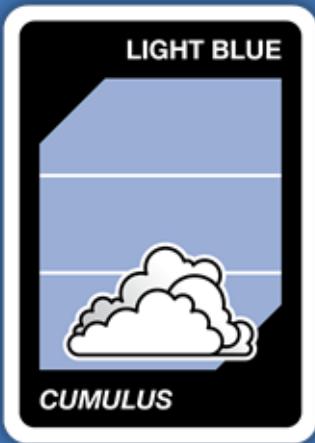

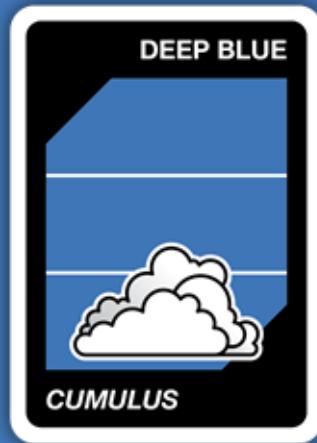

◀ **Sky Color**

◀ **Cloud Type**

Each cloud card has a sky color and a cloud type. There are 5 different sky colors and 11 cloud types.

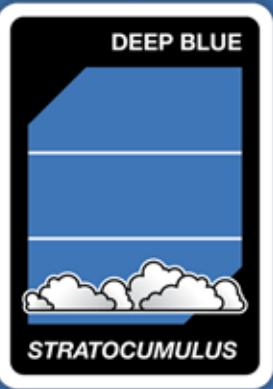

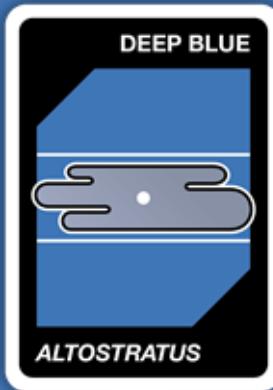

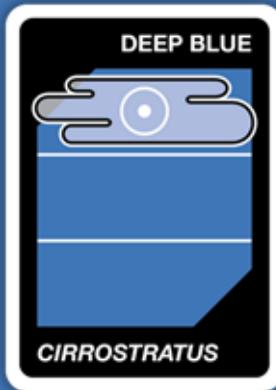

You play by either matching the cloud type or sky color.

# Sky Color - 5 Different Sky Colors

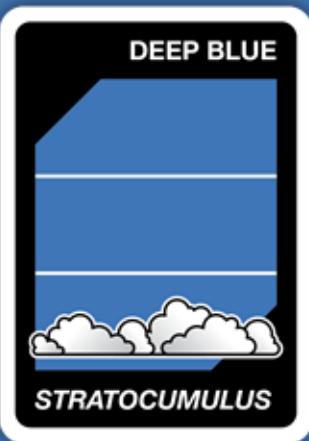

Sky color gives you an idea of how many aerosols are in the sky. The more aerosols, the milkier the sky will look.

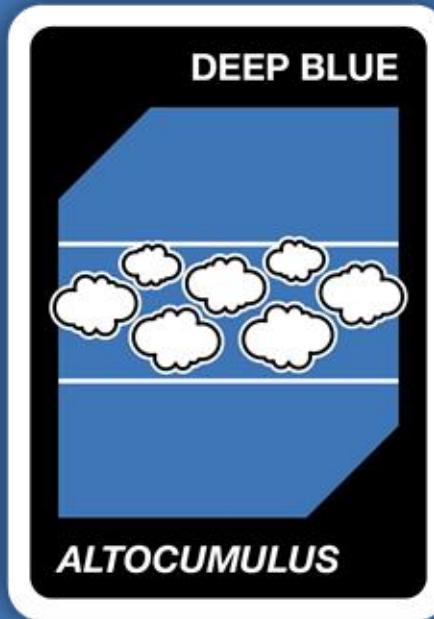

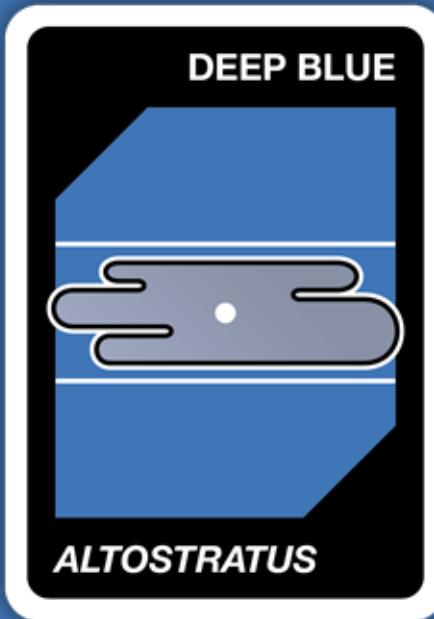

# Cloud Types - 11 Different Cloud Types

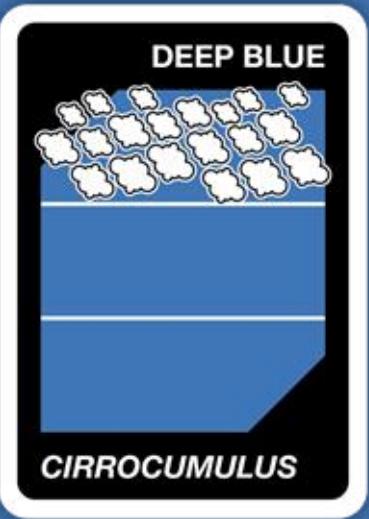

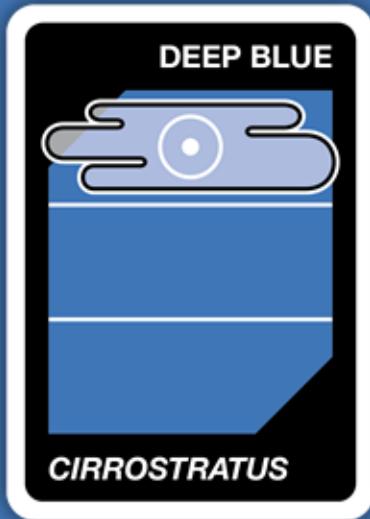

# Low Level Clouds (cloud base height)

# Mid-Level Clouds

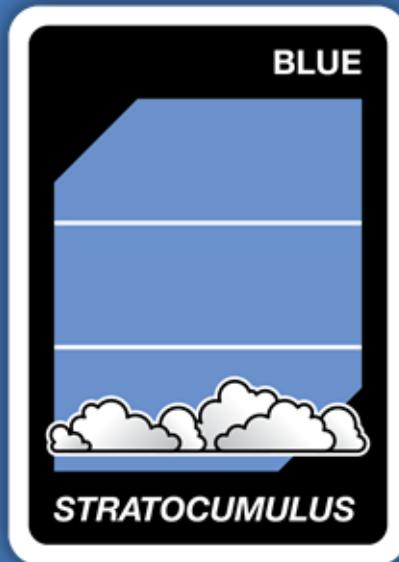

# High Level Clouds

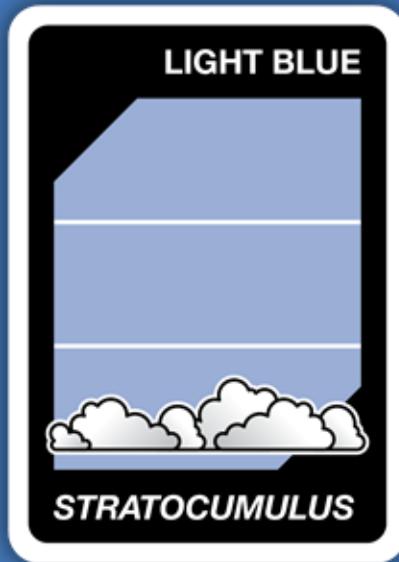

# Let's Practice

You play by either matching the cloud type or sky color. Is this a match?

**Stratus** are low flat clouds.

# Mystery Move

Do the correct cloud dance based on type and altitude of clouds.

C

**Cumulus** is used for puffy clouds.

**Nimbus** is used when a cloud is raining or snowing (precipitation).

**Cumulo** **nimbus** are thunderstorms.

# Quick Review: Rainmaker and Obscuration Cards

# Review: Rainmaker Cards

**Cumulonimbus clouds are thunderstorms.**  
**If you are outside during one, you may want to go back indoors.**

**This card reverses the direction of play.**

# Review: Rainmaker Cards

Nimbostratus clouds produce more of a persistent drizzle that can last all day. If you don't like going out in the rain, are outside during one, you might not go outside at all when a nimbostratus cloud is around.

This card **skips** the next player's turn.

# Review: Obscuration Cards

In real life, an obscuration is something blocking your view of the sky, like dust or smoke. When someone plays an obscuration card, the next player **draws two cards** at the start of their turn. Then, they may play any card from their hand.
